MUSCAT, 122, OMAN, Language Arabic, English, |+968 91262544

Education

Middle East College, Muscat, Bachelor of Science (Hons) in Computer Science Software Technology (Coventry University), GPA 3.5, 2021 – 2026

Activities: Google Developers Group: Technical Lead

Experience

- **Software Development Manager** | Digital Dimension 2026 – Present
- **Full-stack Developer Team Lead** | Omani Archive 2025 – 2026
- **Game Developer** | AL NAHDA Training Institute 2025 – 2026
- **Software Engineer (Intern)** | Rihal 2025 – 2025
- **Full-Stack Developer (Intern)** | Omani Archive 2025 – 2025
- **Self-Employed** | Freelancer 2024 – 2026
- **Head of Research & Development** | Injaz Oman 2024 – 2025

Professional Projects

- **High-Scale Cross-Platform Application (Maintenance & Operations)**
  - Technologies: Unity, C#, Flutter, React, Firebase, Google Play & App Store.
  - Managed the end-to-end maintenance and optimization of a high-concurrency production application serving over 100,000 users.
  - Spearheaded infrastructure stability and feature deployment across mobile and web environments.
- **Multimedia Streaming Ecosystem**
  - Technologies: Flutter, Firebase, Google Play & App Store.
  - Engineered a comprehensive multimedia streaming platform for a local media entity, ensuring low-latency delivery and cross-platform accessibility.
- **Islamic Education Learning Management System (LMS)**
  - Technologies: PHP, Yii2, Hostinger, Thawani Payment Gateway.
  - Architected a scalable Udemy-style web application for course management, integrating secure third-party payment processing for subscription and content delivery.

- **Loyalty & Discount Platform**
  - Technologies: Flutter, Hostinger.
  - Developed a location-aware point-collection mobile application, implementing automated logic for real-time voucher generation and redemption.
  - Research & Development / Academic Projects
- **Machine Learning Framework for Automated Lithology Recognition**
  - Technologies: TensorFlow, PyTorch, ResNet34/50 CNNs.
  - Developed an automated classification framework for geological analysis, focusing on sustainable eco-engineering applications.
- **Appointment Booking System**
  - Technologies: Java, Spring Boot, React, MySQL.
  - Collaborative development of a robust scheduling ecosystem to streamline user appointment management.

Publication

- *A Hierarchical Deep Learning Framework for Automated Rock and Stone Classification: Architecture, Deployment*, and Evaluation, ICADAAI 2026

Languages & Tools

Programming Languages: Java, Python, Visual Basic, Dart, JavaScript, TypeScript, HTML/CSS, C#, PHP

Development Tools: Flutter, Android Studio, React, Firebase, MongoDB, Docker, GitHub/Git, Visual Studio, Visual Studio Code, Anaconda, Cursor, Unreal Engine, Unity, Blender, MS 365, Intellij, Antigravity, Claude

Licenses & certifications

- Video Games with Unity Engine - AL NAHDA Training Institute: February 2026
- JavaScript Algorithms and Data Structures - freeCodeCamp: September 2025
- Machine Learning with Python – freeCodeCamp: July 2025
- Responsive Web Design - freeCodeCamp: February 2025
- Start and Manage a Small Business – LinkedIn: December 2024
- Electronic Arts Software Engineering virtual experience program on Forage: November 2024
- Hewlett Packard Enterprise Software Engineering Job Simulation on Forage: December 2024
- Fundamentals of Deep Learning – NVIDIA Deep Learning Institute (DLI)
  Completed: May 2025
- Six Sigma Yellow Belt - 6sigmastudy: September 2021
- Foundations of Project Management – Google: November 2021
- Technical Writing - Moscow Institute of Physics and Technology): November 2021
